# Matthias Studer

*Associate Professor, LIVES Centre and Institute of Demographics and Socioeconomics, University of Geneva.*

------------------------------------

Matthias Studer is an associate professor in quantitative methods for the social sciences focusing on longitudinal methods and their applications in life-course studies. His research interests include sequence analysis and holistic methods for life-course analysis, on which he published several papers in international journal such as in Sociological Methods and Research, Journal of the Royal Statistical Society: Series A and Sociological Methodology. He is a developer of the TraMineR and WeightedCluster R libraries, the most used softwares for sequence analysis, and the president of the Sequence Analysis Association. Aside from methodological developments, his research interests include labor market studies, school-to-work transitions and family trajectories.
